California Private Land Claims  
Case Expediente Shelf List

by:

Gay L. Ebinger

December 1981

In preparation of this shelf list, each document was examined to discern whether it related to the others in the folder. When papers were out of order, they were filed with the proper claim or placed under the miscellaneous category. For each claim, the following has been recorded:

- 1.) Claim Number. This number is found on the outside of each folder, on the title sheet, and scattered on various documents throughout, as recorded by the Secretary to the Board of Land Claims Commissioners (Thompson Campbell or George Fisher).
- 2.) Tract Name or Identification. The name, such as "San Justo", or identification, "200 varas square at San Gabriel", is marked on the outside of each folder, on the title sheet, and/or mentioned on some of the documents within. Since the inscriptions and the folder and title sheet are translations from Spanish, they have been checked for accuracy. Spelling corrections or additions to the name have been made.
- 3.) Claimant's Name. On occasion, the person who presented the claim before the commissioners was not the previous applicant as stated in the Spanish/Mexican petition. If this is the case, the name indicated on the outside of the folder, the title sheet and/or the subscriptions on the papers by the Secretary to the Board is used. Again, spelling errors were checked. The words "et al" stand for other claimants whose names may or may not be recorded in the papers.
- 4.) Date. A case Expediente commonly has a variety of recorded dates. The date usually selected is one prior to that of the Board of Land Claims Commissioners, as inscribed by the secretary. The reason for this decision is to indicate the approximate time when the claim was applied for or in existence under the Spanish/Mexican government.
- 5.) Number of Pages, Sheets and Disenos. A sheet is a single piece of paper. A page is a side of the sheet, (or if the sheet was folded in two) a section of the sheet, upon which any print, writing, or marking appears. The maker of the diseno is noted, if distinguishable (for this, the book: Designs on the Land, Disenos of California Ranchos and Their Makers, by Robert H. Becker, was consulted). The condition of the documents (ex. "burned") and their legibility (ex. "legible on inner margins") may also be noted.

Notes:

- 1.) The alphabetical listing and items identified as "Transcripts of..." all pertain to the Case Expedientes, but are recorded separately.
- 2.) The miscellaneous category lists unidentified documents and the folders they were taken from.
- 3.) Those numbers not recorded are considered missing.

- 4.) A cross reference to the Case Expedientes can be found in Record Group 49: California Private Land Claims, Bound Volumes I, II, and III. These books contain copies of disenos corresponding to the case numbers.
- 5.) Spelling. A number of letters were used interchangeably: b and v; c, s and z; g and j; i and y; y and ll. If the manuscript is in poor condition due to blurring by the acidic paper, scorching, or uncertain translations, a variety of spellings are given.
- 6.) Accent marks and tildes are not indicated.

The original documents or transcripts thereof consist of the following types of records: petitions for land, disenos (sketch-maps of the petitioned tract), informes (testimonies concerning statements mentioned in the petition), cover sheets, survey descriptions of the tract, survey plats, titles to land, deeds, wills, a diary, petitions for the grant by the heirs and other claimants, correspondences, verifications of signatures, confirmations of court appearances, indentures, transcripts of patents, inventories of the ranchos, confirmations of the act of juridical possession, contracts transferring ownership of the land, and translations from Spanish to English.

It is hoped that the following shelf list will be of assistance to researchers. For an index of the entire Expediente series, consult the Index of the Spanish-Mexican Private Land Grant Records and Cases of California, by J. N. Bowman, located in the Legislative and Natural Resources Branch of the National Archives.
