Question Method Discussion

Is it possible to improve a person's ability to "mind read?"

Background

- Theory of Mind (ToM) is a person's ability to "mind read," that is, understand others' thoughts and emotions.
- Children acquire ToM at an early age and continue to use it throughout their life (e.g., Wellman, Cross, & Watson, 2001).
- Correlational research has found that exposure to storybooks and movies predicted better ToM development in preschoolers (e.g., Mar, Tackett, & Moore, 2013)
- Kidd and Castano (2013) found that reading a passage of literary fiction improved performance on ToM tasks in adults (see Figure 1).
- Our study was intended to replicate Kidd and Castano, using movie clips as the form of media rather than books.

Figure 1: Kidd and Castano (2013) (Exp. 5)

$F(2,352)=3.10, p = 0.04$

Participants (N=101) were randomly assigned to watch a 2-4-min clip from one of the following conditions:

Popular Movies

Non-Human Movie

Academy Award© Movies

Then, Theory of Mind was tested with the following two tasks (counterbalanced for order):

Reading the Mind in the Eyes Test (RMET)

Yoni Task

- In the present study, different movie genres did not improve ToM.
- These results are different from Kidd and Castano (2013). They showed that reading from literary fiction improved ToM, though their effect size was small.
- Next steps to examine whether ToM can be improved could include:
 - a study that manipulates the complexity of the interaction in the movie clip
 - a study that shows longer movies
 - a study that recruits individuals with lower ToM scores
- We will continue to investigate the larger questions, that is, whether and how we can improve one's understanding of others. Such research has implications for bullying, marital satisfaction, and career satisfaction.

Results

Figure 2: Mean correct score on RMET by movie condition

$F(2,98)=0.222, p = 0.801, n.s.$

Figure 3: Mean correct score on Yoni by movie condition

$F(2,96)= 1.813, p = 0.169, n.s.$

Acknowledgements

- This work was presented at Western Psychological Association in Las Vegas, Nevada in 2015. Please communicate with jdyer-seymour@csumb.edu.
- Big Thank you to Psi Chi for their support. Five students received the Psi Chi Travel Grant to attend WPA.
- The Department of Psychology at CSU Monterey Bay provided financial support for travel and printed this poster!
- We thank our supporters who donated money through Mobile Cause. Thank you Debbie Howitt, Gloria Dyer, Wendy Lewis, Mike Guichet, Lilly Martinez, Chrissy Lofgren, Meg Nielsen, and Chrissy Camblin.
- Thank you Lilly and Heather – staff extraordinaire in psychology for their assistance in planning our travel and preparing this poster!
