Eight brown WPA notebooks (pages 1 – 995) appear to be partial transcriptions Spanish/Mexican documents, correspondence and reports and summaries that were of interest/importance to the individual transcriber covering the Spanish and Mexican tenure in Alta California. There does not, in general, appear to be an adherence to a chronological approach.

[The items in the above notebooks were Not Online as information about the WPA Projects are spread out among many different organizations and across a wide variety of subject matters making it difficult to perform specific searches without more detailed information.]

WPA Document entitled: Explanatory Note for “An Alphabetical Index of Patented Private Land Grants in California” – compiled from data in the “Rancho Catalog” of the California State Historical Association – gathered from county archives in 1919 by Historical Survey Commission staff. Supplementary information came from “Report of the Surveyor General for 1886.” Burgess McK. Shumway, chief clerk of the WPA project ... has had entire charge of the catalog in its present form. The numbering of each rancho corresponds to number used by General Land Office (GLO number). Where GLO number was lacking, Public Survey office number was used. A few other numbers were supplied by Shumway. A and B used to designated two separate ranchos of the same name with the same GLO number. Also provides method for Alphabetizing, Abbreviations and Definitions. Grants in this list were confirmed or patented by the US. Several hundred grants were not confirmed or patented and not in this list – subject to further study. -- **Not Online**
