RICHARD W. NUTTER  
AGRICULTURAL COMMISSIONER

Richard E. Rominger, Director  
Department of Food and Agriculture

and

The Honorable Board of Supervisors  
County of Monterey

Gentlemen:

In compliance with the provisions of Section 2279 of the California Agricultural Code, I am pleased to submit the Monterey County Agricultural Crop Report for the calendar year 1977.

Monterey County's gross value for 1977 agricultural crops totalled \$498,510,550. This is an increase of more than \$44.9 million over the 1976 figure.

This was the third year in which the rangeland cattle producers and dryland grain growers suffered serious losses due to the continued drought. Cereal grain crops are down over 11 million dollars since 1975. Cattle values dropped in excess of 5 million dollars over the previous year.

Other segments of County agriculture showed large increases in total value, mainly due to increased acreage and production.

1977 turned out to be a surprising crop year, as few anticipated a large gross value increase, particularly because of the poor market price for lettuce.

Inflation continues to drive growers' cost upward, resulting in diminishing returns.

The values represented here are gross receipts of the producers and do not take into account the costs of production, transportation, or marketing. No attempt is made to reflect net income of the producer.

My thanks to the individuals and firms whose cooperation made this report possible, and to my staff, under the direction of Deputy Agricultural Commissioner Don Rochester and Senior Agricultural Inspector Bill Nutley, who coordinated and compiled this report.

Very truly yours,

Richard W. Nutter  
Agricultural Commissioner

RWN:ms

## C R O P   H I G H L I G H T S   -   1 9 7 7

The total gross value of the Monterey County Agricultural Industry for 1977 was \$498,510,550. This was an increase of \$44,965,000 over the 1976 total.

Lettuce value was down \$24,527,000 from 1976. This was caused by higher acreages and yields, at lower per carton returns.

This loss was offset by substantial increases in production and value in several crops.

Increased producing acreage in both strawberries and grapes, plus favorable markets, raised the overall Fruit and Nut value almost 31 million dollars.

In vegetable crops, production, acreage, and value increased in several crops, notably broccoli, tomatoes, and garlic. Total value of these crops increased \$26,989,000.

Field crops were severely affected by drought conditions in 1977.

Sugar Beets were down 6,640 acres, and \$3,584,000 in value.

Barley production and value has continued to decline, primarily due to weather conditions. Also affected were the beef cattle producers. Total head for 1977 was down by 31,570, while value dropped \$5,233,000.

Nursery crops showed little change over the previous year, as production and prices remained fairly constant.
