LETTER FROM THE COMMISSIONER

To: Honorable Board of Supervisors
Mr. Harry Ovitt, Chair District 1
Mr. Laurence L. Laurent, District 2
Ms. Evelyn Delany, District 3
Ms. Ruth Brackett, District 4
Mr. David Blakely, District 5; and

Mr. Robert Hendrix, San Luis Obispo County Administrative Officer
Mr. Henry Voss, Director California Department of Food and Agriculture

We are pleased to submit our 1992 Annual Report for San Luis Obispo County's agricultural industry. Commodities produced in 1992 totaled an estimated \$275,183,000 in *gross receipts*. Although not an all-time high, the total is approximately \$15,000,000 higher than 1991. Significant improvements in weather and overall increased values for vegetable crops were the primary contributors to the upward trend. The report shows the total farmgate value of local agricultural commodities.

These receipts represent approximately \$825,000,000 of agriculturally related economic activity for the San Luis Obispo County area, using a conservative multiplier factor of three. This value of "agribusiness" includes the many businesses and workers supporting agriculturalists in production, processing and wholesale marketing of their products.

In the midst of the ever expanding electronic era, the capability to compile, store and display information becomes critical. This year we highlight an innovative computer technology which can transform everyday data printouts into highly effective management tools. The department is developing two pilot projects using a *Geographic Information System (GIS)*. This system generates spectacular maps capable of quickly displaying a wide range of information. Whether mapping pesticide use adjacent to endangered species habitat or cropland near Diablo Canyon, the ability to relate information to maps is a powerful technology for managing natural resources and addressing complex geographically-based issues.

We extend our appreciation to all sectors of the agricultural community for assisting us in gathering the information, and to the hard-working staff who compiled and finalized the report.

Sincerely,

Richard Greek
Agricultural Commissioner/Sealer

SUSTAINABLE AGRICULTURE SAN LUIS OBISPO COUNTY

The Food and Agricultural Code requires the Agricultural Commissioner to include a summary of sustainable agricultural practices in the Annual Report.

County Biological Control Program

<u>PEST</u>	<u>BIO-CONTROL AGENT</u>	<u>SCOPE OF PROGRAM</u>
Ash White Fly	Parasitic Wasp	Countywide
Elm Leaf Beetle	Parasitic Wasp	3 sites
Western Grapeleaf Skeletonizer	Parasitic Wasp	5 sites
Egyptian Alfalfa Weevil	Parasitic Wasps (2)	1 site
Blue Gum Psyllid	Parasitic Wasp	1 site (monitored)
Eugenia Psyllid	Parasitic Wasp	1 site (monitored)
Puncture Vine	Seedhead & Stem-mining weevils	36 sites
Yellow Star Thistle	Seedhead Weevil	6 sites

Pest Exclusion

<u>PEST/RATING*</u>	<u>HOST/ORIGIN</u>	<u>NUMBER OF INTERCEPTIONS</u>
Mealybug/nymph/Q	Dracaena, Crotons/Costa Rica	2
Snail/Q	Pothos/Guatemala	1
White Fly/Q	Gerbera/Florida	1
Insect Eggs/Q	Dreacaena/Costa Rica	1
Plant Hooper/Q	Orchids/Mexico	1

Pest Detection

<u>DETECTION PEST</u>	<u>NUMBER OF TRAPS</u>	<u>SERVICING</u>
Mediterranean Fruit Fly	300	8,110
Oriental Fruit Fly	110	3,109
Melon Fly	65	1,382
Mexican Fruit Fly	116	4,937
Japanese Beetle	121	1,020
Gypsy Moth	170	1,463

Organic Farming

<u>CROPS</u>	<u>NUMBER OF GROWERS</u>	<u>ACRES</u>
Vegetables (47 kinds)	12	329
Fruit & Nut (30 kinds)	55	2,000

Soil Conservation

U.S.D.A. Conservation Reserve Program	100,601 acres
---------------------------------------	---------------

* Q Rating: An organism requiring temporary enforcement action pending determination of a permanent rating. The organism is suspected to be of economic importance but its status is uncertain because of incomplete identification or inadequate information.

PEST PREVENTION

Pest Prevention protects local agriculture from exotic pests, such as Medfly. We inspect incoming shipments daily at our post offices, shipping companies, airports, and nurseries. In case a destructive pest slips past our safety net of inspection, we have up to 27 insect traps per square mile in our urban areas. These traps and other detection activities allow for the early detection and eradication of exotic pests.

1992 Achievements

- Over 250,000 units were inspected and 16 serious pests intercepted
- Certified 1600 shipments for export
- 22,000 insect trap inspections

1993 Developments

- Increased efficiency of insect trapping
- Computerized export certification program

PRODUCT QUALITY

We enforce quality standards to ensure the highest quality of produce, eggs and honey. There are also high standards for nursery stock and seed products. We certify the 11 local Farmer's Markets for produce being sold directly from the producers to the consumers. We make frequent inspections to guarantee that produce sold is top notch.

1992 Achievements

- Statistically sampled over 5,000,000 cartons of lettuce
- Registered 43 organic growers

1993 Developments

- Public education for Lettuce Root Aphid

LAND USE

Agricultural resource protection is the goal of this multifaceted program. We assist in preventing agricultural/residential conflicts through review of development proposals. We participate in the preparation of the Agriculture Element of the County General Plan and the County's Agricultural Preserve Program. We assist state and local agencies in nuclear power emergency plan and are able to provide vital agricultural land use information in the event of an accident at Diablo Canyon Nuclear Power Plant.

1992 Achievements

- 154 land use projects reviewed
- Completed cropland mapping of coastal areas

1993 Developments

- Develop operating Geographical Information System
- IPZ graded exercise

PEST MANAGEMENT

The Africanized Bee is headed our way and we are informing the public of appropriate precautions. Biocontrols are used to manage insect and weed pest problems, reducing pesticide use. Refined habitat maps are being developed for the protection of endangered species. We have implemented the use of an alternative treatment for ground squirrel control while maintaining protection of non-target species.

1992 Achievements

- 467 acres of road rights-of-way treated for noxious weeds
- Sponsored three endangered species mapping workshops

1993 Developments

- Develop local pest management plan for endangered species
- Public education for Africanized Bee

ENVIRONMENTAL PROTECTION

We protect the public's health and safety with a comprehensive pesticide regulatory program. We do this through enforcement, user education, protection of agricultural workers, samples of pesticide residues and monitoring use. Pesticide use is monitored through a detailed permit process and a tracking system for non-restricted materials. Farmers who store hazardous materials are registered at our office.

1992 Achievements

- Conducted 10,429 compliance checklist inspections
- 98% compliance rate
- Sponsored two grower compliance workshops
- Co-sponsored highly successful chemical roundup

1993 Developments

- Computerized mapping of pesticide use reports
- Field inspection computerization

MEASUREMENT STANDARDS

Fairness is our business. Things that you buy, such as groceries and gasoline are tested for correct weight, measure, count or time. We protect the public from purchasing goods that are "short" weight or measure.

1992 Achievements

- State certification of Vapor Meter test lab
- Implementation of prepacked firewood test procedures

1993 Developments

- Implementation of Vapor Meter test lab
- Field inspection computerization

VEGETABLE CROPS

Vegetables crops increased nearly 11 million dollars in value compared to 1991, with Broccoli leading the way. Harvested acreage remained constant, though yields were mixed. With some exceptions, prices were generally up in 1992.

Crop	Year	Harvested Acreage	Production		Unit	Value	
			Per Acre	Total		Per Unit	Total
Beans (Green)	1992	295	464	136,880	30#	\$8.51	\$1,165,000

FRUIT & NUT CROPS

Acreage and value increased to near record levels due to the increased production of strawberries and apples. Avocados continued to suffer from the 1990 freeze. Citrus crops dipped in value due to a big drop in price. Wine grapes, the leading crop in value, was essentially unchanged from 1991.

Crop	Year	Bearing Acreage	Production		Unit	Value		
			Per Acre	Total		Per Unit	Total	
Almonds	1992	2,400	0.032	77	Ton	\$3,752.00	\$288,000

- B Does not meet California Agricultural Statistics Service requirements for bearing acres.

Geographic Information Systems - Pulling for our Future

FIELD CROPS

Field crop values increased modestly overall due to increased rainfall during 1992. Overall harvested acreage trended down with the exception of safflower, which increased substantially. Generally, prices remained depressed.

Crop	Year	Acreage		Production		Unit	Value	
		Planted ^C	Harvested	Per Acre	Total		Per Unit	Total
Alfalfa Hay	1992		3,850	5.30	20,405	Ton	\$100.00	\$2,041,000

TOTAL SEED CROP	1992		2,005	\$519,000
	1991		1,850	\$545,000

[◆] Vegetable, dry bean, flower, safflower

ANIMAL INDUSTRY

Overall animal industry changed very little compared to 1991. Although grazing conditions were much improved, previous reductions in the size of herds dampened gains in the beef industry. Except for a sharp increase for lamb, prices remain approximately the same as in 1991.

Commodity	Year	Number of Head	Production	Unit	Value	
					Per Unit	Total
Cattle and Calves	1992	50,000	287,500	Cwt	\$ 84.00	\$24,150,000
	1991	56,000	280,000	Cwt	85.00	23,800,000

NURSERY STOCK

The nursery industry set a new record, increasing by approximately two million dollars. Ornamental and bedding plants posted the largest increase, nearly doubling in value.

Crop	Year	Harvested Acreage	Greenhouse Prod'n (sq ft)	Value
Cut Flowers (Field)	1992	428		\$8,162,000
	1991	114		6,023,000
Cut Flowers (Greenhouse)	1992		1,398,185	4,842,000
	1991		2,048,000	8,197,000
