RICHARD W. NUTTER
AGRICULTURAL COMMISSIONER

Director, California Department of Food and Agriculture
and
The Honorable Board of Supervisors, County of Monterey

In compliance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Monterey County Agricultural Crop Report for the calendar year 1983.

Monterey County Agriculture inched toward the one billion dollar mark as a record gross value of \$939,619,500 was recorded for 1983. This 13% increase, or \$123,000,000 over last year, was attained in spite of disastrous weather conditions.

As expected, Head Lettuce remains the leading County crop, generating an impressive \$254,052,000. This was achieved despite a reduction of 5,200 acres.

Broccoli continued in the number two slot, with a gross value of \$112,383,000, an increase of \$14,329,000.

Other crops with significant increases were Carrots, Celery, Mushrooms, Strawberries, and Nursery Stock.

The County's Wine Grape Industry suffered another severe setback amounting to \$5,728,000. This segment of our agricultural industry continues to suffer from foreign imports, over-production, and weather caused losses.

Because of the weather conditions, many growers were able to farm only portions of their land; some elected to allow the land to remain fallow. Economic conditions, such as interest rates, fuel, labor, and taxes continue to be a concern with the agricultural community. One major grower chose to discontinue farming operations while their leases were picked up by various smaller farming operations.

The values represented in this report are gross receipts of the producers, and do not take into account the various costs of production, marketing, or transportation. No attempt is made to reflect net income of the producer.

My thanks to the individuals and firms whose cooperation made this report possible, and to my staff members, under the direction of Senior Deputy Agricultural Commissioner Don Rochester and Senior Agricultural Inspector Bill Nutley, who coordinated and compiled this report.

Very truly yours,

Richard W. Nutter
Richard W. Nutter
Agricultural Commissioner

RWN:mIs

AGRICULTURAL COMMISSIONER

C R O P H I G H L I G H T S - 1 9 8 3

The 1983 agricultural year set a record high for Monterey County with a gross value of \$939,619,500. This was an increase over the 1982 total of \$122,698,700.

An extremely wet winter and spring of 82/83 caused prices to rise due to less availability of some crops. This situation continued into the summer, with crop shortages caused by unusually warm weather.

Fruit and Nut crops totalled \$109,139,000, an increase of \$1,277,000 over the 1982 value. A rise in Strawberry production and value, and a decrease in grape values allowed for only a modest overall increase in this category.

Vegetable crops showed the largest increases, with a total of \$672,670,000, a value increase of \$111,219,300 over the 1982 crop year. Lettuce crops led the way with \$276,291,000, a \$68,430,000 increase over 1982's total. Other significant value increases were Broccoli, \$14,329,000, and Celery, \$18,334,000. Some crops did not fare as well. Artichokes were down in value by \$4,142,700, Tomatoes lost \$7,275,000, and Garlic decreased \$3,188,000.

Field crops lost \$2,362,500 from the previous year. Losses in Small White Beans and Processed Corn accounted for this decrease in value.

Nursery Crops had an increase of \$8,919,000. Higher production and value in Carnations, Roses, and Potted Plants accounted for much of this increase.
