AGRICULTURAL COMMISSIONER
ADMINISTRATOR OF WEIGHTS & MEASURES

Mr. Jack C. Parnell, Director
California Department of Food and Agriculture

and

The Honorable Board of Supervisors of Monterey County

Barbara Shipnuck, Chairwoman, Second District
Marc Del Piero, 1st District
Dusan Petrovic, Third District
Sam Karas, Fourth District
Karin Strasser Kauffman, Fifth District

In compliance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Monterey County Agricultural Crop Report for the calendar year 1988.

County Agriculture again reached an all time high. 1988 gross value totaled \$1,159,024,500, an increase 6.5% or \$70,334,200 over the previous crop year. Lettuce, Broccoli, Cauliflower, and Celery, normally the pace setters of our crops, showed significant decreases in value primarily due to depressed markets and acreage reduction. However, this was offset because of strong showing by Strawberries, Grapes, Mushrooms, Livestock, Salad Products, Tomatoes, and Nursery Stock.

Head Lettuce total acreage remains about the same. This crop reached an all time high in terms of production but the price dropped \$1.00 per carton causing overall value to be down \$14,400,000.

Strawberry acreage continued to increase which is responsible for establishing this commodity as the number two County crop.

Broccoli had a reduction in acreage of 5,700 and a \$1,700,000 drop in value.

Salad Products and Food Service items which are supplied to fast food businesses and for institutional uses continue to show dramatic increases. Products for export to Pacific Rim Countries were found to be profitable for many shippers. While overall exports have increased, growers were faced with the second consecutive dry year which caused increased growing costs. In addition, there were concerns about food safety, foreign imports, and adjustments in labor uses.

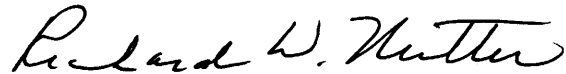

The value and acreage devoted to Nurseries and Cutflowers continued to increase, with some export markets being developed.

Livestock producers again faced a dry year and poor feed supply which was partially offset by increased prices and strong demand.

The values represented in this report are gross receipts of the producers, and do not take into account the various costs of production, marketing, or transportation. No attempt is made to reflect net income of the producer.

My thanks to the individuals and firms whose cooperation made this report possible, and to my staff members, under the direction of Senior Deputy Agricultural Commissioner Don Rochester, Deputy Agricultural Commissioner Gerry Willey, and Agricultural Inspector Katherine Smith, who coordinated and compiled this report.

Very truly yours,

Richard W. Nutter
Agricultural Commissioner
