

SelectedWorks Faculty Profiles

[SelectedWorks](#) is the portion of CSUMB's institutional repository, *Digital Commons @ CSUMB*, that highlights faculty research, scholarship, and creative work. This resource provides faculty with the opportunity to create individual profiles, which helps ensure that their articles, books, presentations, and other forms of work have the widest accessibility possible. SelectedWorks provides individual faculty with the ability to track the impact of their research and scholarship through detailed analytics and global download maps. The work contained in each is fully at the discretion of a given faculty member and does not entail a transfer of copyright.

These profiles allow researchers to manage a public record of scholarly publications, presentations, and other materials, including:

- Your photo
- A description of your work and research specialties
- Your CV
- Links to personal websites and blogs
- Areas of research
- Courses taught

Any materials that are **important to your career can go on a SelectedWorks site**, such as:

- Articles
- Book chapters
- Conference presentations
- Other materials, such as book reviews, editorials, or dissertations

Advantages of SelectedWorks:

- Easy to manage, organize and upload research, coursework, presentations, data etc.
- Generates readership reports
- Features search engine optimization, making your work more findable to a global audience via resources such as Google Scholar
- Allows the option of sending out mailings to subscribers
- The page is yours and you can take it to another institution
